Remembering the Colors of the Rainbow!

A **mnemonic** is a group of words that help you remember something. Sometimes the words are extra silly or they might rhyme..

For example, HOMES is a well-known mnemonic for remembering the names of the Great Lakes. If you take the first letter of each of the Great Lakes (Huron, Ontario, Michigan, Erie, Superior), the letters make the word HOMES.

What memory trick can you create to remember the colors of the rainbow?

R

O

Y

G

B

I

V

Phrase: _____

Compound Words!

A compound word is one larger word that is formed by joining two smaller words.

Rainbow is an example of a compound word: rain + bow = rainbow!

For each picture below, write the two words that make up the compound word.

rain

+

bow

+

+

+

+

What's the Place Value?

Match the numbers in the first column with the words in the second column.

81,462

three tens

28,130

six ten thousands

1,697

four hundreds

379,041

three thousands

66,527

nine ten thousands

979,204

two thousands

3,233

seven ones

802,760

one ten

99,998

nine hundred thousands

46,815

zero hundreds
